MODERN STATISTICAL SOFTWARE FOR ALL REQUIREMENTS

Whether you need the current machine performance in tabular and visual form, wish to access the current plant status (production, downtime, waiting time) in real time, or even want to view the chronological record of all machine functions. All this data is available on demand and can be viewed, saved and processed on mobile devices such as smartphones, tablets or on the integrated PC for statistical analysis.

Display of machine activity (cycle times)

Display of chosen machine data
